SPREADSHEET POWER FOR PC USERS

If you have serious in-the-field need for a spreadsheet program capable of running on your Sharp PC-1500, PC-1500A or Radio Shack PC-2, then listen up! We are now providing the latest in a generation of spreadsheets developed for these PCs. This newest package, called Super SST-16, is designed to run on the above pocket computers when they are equipped with the Sharp CE-161 (or equivalent) 16K memory module. Super SST-16 provides unprecedented spreadsheet power in a pocket computer.

First of all, it is capable of storing up to 200 spreadsheet cells in a 10 row by 20 column matrix. (If you need more cells than this, then you should be using a desktop computer.)

Second, it is absolutely the fastest pocket spreadsheet ever developed for pocket computer use on these machines. The key to this blazing operation is the use of pure machine language in the critical data analyzing portions of the package. You can evaluate complex formulas at a rate approximating 10 cells per second. This is 25 or more times faster than competitive spreadsheet packages. No more need to wait intolerable minutes to evaluate a spreadsheet on your pocket computer. Our Super SST-16 evaluates mathematical models, financial projections, engineering data, etc., in a matter of seconds -- right while it is sitting in the palm of your hand!

Third, at the request of many professionals, we have added a fifth mathematical operator: exponentiation! Now you can raise to powers and extract roots in expressions. Coupled with the four standard operators (+, -, * and /) and our efficient summation function, which can be used in any and all cell expressions, this new exponentiation capability offers exciting potential for serious applications.

There is more, of course. If you are not familiar with our earlier PC spreadsheet packages, then you should know that we have retained all of our original features such as: the ability to label columns and rows so as to caption printouts, easy cell data entry procedures, horizontal and vertical scrolling of the display for viewing spreadsheet results, simple menu-driven operation, ability to save/restore spreadsheets on cassette tape, and more! All of this

conveniently at hand in your pocket computer. Truly amazing!

Never used a spreadsheet before? Here is a low cost way to learn. Instead of spending hundreds of dollars to evaluate their use and application on a full-sized computer, you can learn at a fraction of the price on your pocket computer! We provide easy to understand instructions with the Super SST-16 package. In just minutes you will be experimenting on your own. It is easy and fun. Learn any time you want since your pocket unit can always be handy.

Already a professional spreadsheet user? You just might appreciate having a "mini-spreadsheet" by your side -- even if you do your most serious spreadsheet work on a desktop computer. It is amazing how convenient it is to be able to do meaningful spreadsheet operations off to the side (on your pocket unit) when you want to quickly evaluate options. If you are an "in-the-field" scientist, engineer, financial analyst, or other "calculating" professional, the "pocketable" spreadsheet can be a priceless assistant.

Best of all, you can order your copy of our Super SST-16 now! (Remember, your Sharp PC-1500/PC-1500A or Radio Shack PC-2 must be equipped with a 16K [CE-161 or equivalent] memory expansion module in order to use this program.) We will promptly ship the program (supplied on cassette tape for loading via a CE-150 or equivalent tape interface) complete with easy to use operating instructions. Order today so that you can be spreadsheeting soon. Use the order coupon below for fast service.

HOW TO ORDER THE SUPER SST-16 SPREADSHEET PACKAGE

Send in your order on this coupon. Please include payment.

__ $59.95 for the Super SST-16 program package when shipped for delivery in the United States of America.*
__ $64.95 (U.S. dollars) for the Super SST-16 program when shipped to Canada or Mexico.
__ $74.95 (U.S. dollars) for the Super SST-16 program when shipped to other regions.
__ Check here if paying by MasterCard or VISA. Please give credit card information below.
* Connecticut residents must add $4.50 State Sales Tax.
